## **City of West Lafayette Stormwater Service Charge Dispute Form**

November 22, 2013

Dear Property Owner,

Please use the attached dispute form for stormwater service charge disputes. Please note that the ordinance that allows the City to assess the stormwater service charge may be found online at <http://library.municode.com/index.aspx?clientId=16787> Chapter 116, Article IX. Appeals are defined by Section 116.906.

Please understand that the stormwater service charge is based on owning developed (impervious area) property within the City of West Lafayette. Impervious area is defined as building cover parking area (asphalt, concrete and compacted gravel). The service charge is not based on where your stormwater is or is not flowing. All developed property within the legal limits of the City of West Lafayette is assessed the charge based on impervious area. If you feel you have been assessed charge in error, please use the attached dispute form to help us resolve your dispute.

The Ordinance also establishes a Storm Water Service Charge Credit program. For details about the credit program and eligibility see <http://www.westlafayette.in.gov/departments/division.php?fDD=11-60> or contact the Engineering Department at 765-775-5130.

If you have additional questions about how your service charge is assessed and or questions about this form, please contact Michael Susong, Assistant City Engineer at 765-775-5130.
